Objective:

- To work as a Naval Architect, applying engineering expertise to optimize operations.

Key Proficiencies:

- Ship Design and Construction
- Hydrostatics and Stability
- Resistance and Propulsion of Ships
- Marine Maintenance and Repair
- Shipbuilding Materials
- Marine Production and Planning
- Dredger and Dredging Technology
- Maritime System and Regulations
- Sourcing and Procurement
- PR, PO, and CBS Documentation
- Marketing Research and Analysis
- Team Lead and Communication
- Operations Management and Costing
- Human Resource Recruitment

Academic Qualification:

- MBA in Marketing from the University of Dhaka (January 2025 – Present).
- Post Graduate Diploma in Supply Chain Management (PGDSCM) from ISCEA Bangladesh (September 2024 – March 2025).
- B.Sc. in Naval Architecture and Marine Engineering from the Bangladesh University of Engineering and Technology in 2024.
- HSC in Science from Dhaka City College in 2015.
- SSC in Science from Government Laboratory High School in 2013.

Work Experience:

Business Operations and Development Officer

Tech Marine Solutions Ltd. (23 June 2025 - Present)

- Coordinated the launch of the Vikings Boat brand, overseeing the manufacturing of FRP boats for both local and global markets.
 - Conducted exploratory marketing research and cost analysis for a 5m FRP boat.
 - Designed a factory layout to enhance production efficiency by ensuring optimal movement.
 - Led the IT team in creating the company's brochure and website.
- Directed IT team transformation—motivated members, facilitated stakeholder collaboration, and recruited talent to deliver websites and apps for the company.
- Developed digital marketing strategy, driving increased web traffic and contract fulfillment.
- Assisted Admin and HR for administrative decisions, supporting team development and operational efficiency.

Executive - Procurement, Logistics and Admin

ARCED Foundation (01 February 2025 – 04 June 2025)

- Managed procurement, contracts, and vendor coordination for 5 development projects, ensuring compliance and timely execution aligned with project goals.

-
- Handled office administration, logistics for 7 training sessions, and documentation workflows, including Gantt chart implementation to optimize operational efficiency

Intern – Procurement, Logistics and Admin

ARCED Foundation (20 October 2024 – 31 January 2025)

Industrial Training:

Khulna Shipyard (21 days)

- Observed daily ship-building operations across departments, documented workflow insights and ranked 10th among 46 participants.

Project:

- **FRP Boats Manufacturing Project (Ongoing)**

Manufacture durable and economical fiber-reinforced plastic boats to cater to the increasing demand of both the global and local markets as part of Tech Marine Solutions Ltd.'s business expansion plan.

To ensure this, we-

- Work with experienced Naval Architects and skilled laborers who have hands-on experience.
- Use a temperature and humidity-controlled room for layup and curing.
- Follow the shingling overlapping technique to ensure structural integrity of the hull while slamming in waves.

- **Mitigating the Risks of Supply Chain Uncertainty on Manufacturing Planning and Control at Walton Hi-Tech Industries PLC (PGDSCM).**

Analyzed supply chain risks affecting refrigerator and freezer production, and recommended strategies—like lean manufacturing and advanced forecasting—to strengthen planning, inventory, and distribution control.

- **Ship Design Project (NAME 338), BUET**

Completed the design of an **1800-ton DWT inland oil tanker** (Narayanganj–Chattogram, 10 knots), covering key areas such as–

- **Hull & Layout:** GA, lines plan, shell expansion, midship & longitudinal construction
- **Naval Architecture:** Hydrostatics, stability, trim, resistance & powering
- **Structure & Machinery:** Scantling, engine & steering gear selection, rudder, shafting, propeller and engine foundation design

Thesis:

- **Comparative Motion Analysis of CS50 MK II and Conventional Semi-Submersible in the Bay of Bengal: A Numerical Study**

Conducted a numerical investigation of hydrodynamic motion responses of moored semi-submersibles using site-specific wave spectra and current data. Applied potential flow-based diffraction–radiation theory and time-domain simulations to evaluate platform performance, highlighting design trade-offs relevant to deep-water offshore operations.

Tools/Methods: ANSYS AQWA, potential flow theory, RAO analysis, wave spectrum modeling, offshore mooring analysis.

Publication: Accepted in *Journal of Maritime Research (JMR)*, Issue 2 (2026), publication date: 30

August 2026.

Training:

- Obtained “Google Data Analytics Professional Certificate”, “Customer Analytics” and “Operations Analytics” certification offered by Google and Wharton University of Pennsylvania, respectively, in 2023.
- Obtained DELF A1, A2, and B1 issued by France Éducation internationale, an organization under the Ministère de l'Éducation nationale et de la Jeunesse of the French Republic.

Extra-curricular Activities:

- Assistant Organizing Secretary (2018 – 2019) at Laboratorians' Association of BUET.
- Blood donor and volunteer at BADHON, BUET.
- Étudiante de l'Alliance Française de Dhaka: Learned French through various activities such as singing, theatre, drawing, presentation, audio podcasting, debating, etc.
- Acting Class Representative for Economics (MKT 504), Principles of Marketing (MKT 501), and Supply Chain Management (MKT 513) courses in the MBA Program at the University of Dhaka.
- Participated in a FIFA gaming contest held at the Russian Cultural Center, Dhaka, in 2014 and reached the 2nd round.

Computer Skills: Microsoft Office, G-Suite, AutoCAD, BricsCAD, HydroStar, Ansys, Fortran99, C++, R, Big Query, Prompt Engineering, Google Stitch, Canva.

Language:

- Native speaker of Bengali
- Proficient user of English
- Independent user of French.
